With Spring nearly here, we've put together some tips and tricks for giving your website a refresher. Here are a few pointers for the process.

Create High-Res Graphics That Don't Slow Page Speed

Are high-resolution graphics slowing down your page load time?

We have a few tips on how to employ graphics that don't break your servers.

Are You Filtering Uptime.com Traffic From Your Google Analytics?

Uptime.com checks can send over 1,000 "user" visits a day, and may skew data. Google should filter most of this traffic automatically, but this trick will remove the variable of Uptime.com from your reporting entirely.

Learn how to filter traffic in GA

Web Security: Keep Your Site Safe

Are your existing website security measures monitoring DNS changes or keeping you off the malware blacklist? Learn how Uptime.com checks detect these threats and more.
