

Uptime.com has released a slew of updates for November that include SLA reporting, and important functionality for accountability. SREs can leverage Uptime.com data via customized reports, with new options for subscribers.

Let's enjoy the calm before the holiday storm with some quick updates and industry news.

What's New at Uptime.com

Downloadable SLA Reports

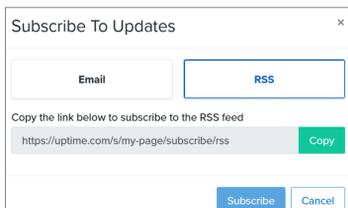

The Uptime.com SLA Report allows your organization to report on specific checks or systems for the purposes of SLA accountability. Create and download a PDF SLA Report for specific checks or systems for distribution to clients or team members.

Find out more in [our documentation](#) on SLA Reports.

RSS Subscription Options Available for All Status Page Varieties

RSS feeds are available with your Uptime.com Status Page. Enable subscribers and any visitor can subscribe to the RSS feed URL provided by Uptime.com.

View our documentation to find out how to [enable subscribers in your Uptime.com status page](#).

Transaction Check and User-Agent Update

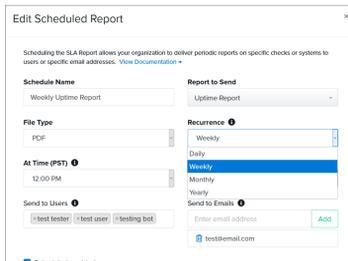

The Uptime.com Transaction check tool has received an upgrade to a more recent version of Chromium, **86.0.4240.111**. Uptime.com Transaction checks also feature a new user-agent along with a number of improvements.

See our documentation on the [user-agent](#) change, or read up on our [Transaction check tool](#).

Schedule Reports

Schedule a Report to deliver a PDF document to either Uptime.com users or external email addresses. Click **Reports>Scheduled Reports**.

Read more about [scheduled Reports](#) in our documentation.

Industry and SRE News from Uptime.com

The Q3 Uptime Report

Our Destimate for Q3 of 2020 is fairly high, which means you can be both incompetent and short-lived in this new normal in which we find ourselves. We expect the average business with monitoring and minimal IT resources to lose 17.4% of revenue on the conservative side, and as much as 22.35%. What we have learned in Q3 is that complacency allows internet downtime to fester.

What to Do When Your Site Experiences a DDoS Attack

It's always in the early dawn hours – an SMS alert on your phone forces you to drag up your eyelids and look at a text: your site traffic has surpassed its usual threshold. You pull yourself out of bed and begin to investigate. Traffic won't stop and your brain doesn't want to jump to its conclusion: ...could it be a DDoS Attack?
