

Team Uptime.com just completed our 2021 summit, and we're full of ideas for the future.

This month we are highlighting a few of our handiest features to gear you up for a summer rush. From Status Pages to critical reporting, going granular with data gives you the information you need for key decisions and accountability.

Featured Items

Enabling Status Page Subscribers

Each Status Page includes the ability for subscribers to receive updates throughout your incident management process. When you create or update an incident, simply tick the box to notify subscribers and Uptime.com will send an email notifying your users.

Setting SLA Values

SLA values put key performance metrics front and center. [You can set SLA values within your checks](#), which help provide context for your reporting.

Edit Check

Basic | **Advanced** | Escalations | Maintenance

Sensitivity: 2 locations | Number of Retries: 2

Timeout: 30 | Use IP version: Any

Target SLA %: 99.00 | **Target Response Time SLA (secs)**: 1.000

Notes: These are test notes

Include in metrics

Once set, you can use your SLA values to customize the feel of your reporting. Use scheduled reporting to send these key metrics direct to stakeholders.

Uptime Section | **Response Time Section**

Show Target SLA values on report
 Show only checks with downtime
 Show only checks below SLA

Sorting: By lowest uptime

Show Target SLA values on report
 Limit to 5 checks per type
 Show only checks below SLA

Sorting: By slowest response time

Forgetting Something?

Diagnosing SSL and DNS errors is notoriously difficult, and very often painful. Create SSL and DNS checks with Uptime.com to gain more context when you spot these elusive outages.

Add Check

Basic | Advanced | Escalations | Maintenance

Name of check

Check interval: 5 minutes

Check type: DNS

Contacts: Default

Tags

Visibility affects everything. Take advantage of the full check suite offered by Uptime.com. See [our overview of checks](#) to learn what you might be missing.

Industry News from Uptime.com

Preparing to Fail Fast

The principle of *fail fast* is either the best thing since the transistor or nothing but hot air. It depends on the size of your organization and the cohesiveness of your teams. If your team members have a strong working relationship, and dev is well integrated with everyday work company-wide, you already have a good foundation for this particular agile thinking.

That's why we looked at methodologies that help us fail fast, recover faster, and learn fastest

Uptime.com Among the Best

For the third consecutive year, Uptime.com is rated among the best overall web monitoring services for 2021.

What Customers Say About Uptime.com

"I can be confident that our app is working, and if something happens with it, I know I'll be alerted to it faster than users could even reach out."

-Jacob via Captterra
