

Cresting the middle point of April, we're checking in with exciting updates and ideas on how to use Uptime.com to enhance your monitoring. If you want to see what's to come in 2021, check out the Spring Upload post below.

Let's get to it!

Featured Items

GDPR Compliance

Uptime.com is GDPR compliant, and we have made a number of changes to our organization that impact how we store and handle your data. To learn more about these safeguards check out our [GDPR compliance page](#).

Changes to Alert Emails

We always recommend reviewing your real-time analysis as well as your internal logs, so we have added suggested steps and links to alert emails to assist in diagnosis.

Error: HTTP WARNING: HTTP/1.1 400 Bad Request - 1328 bytes in 0.306 second response time

time=0.305935s;;0.000000 size=1328B;;0

Suggested steps:
 After reviewing the [Alert](#), use [Real-Time Analysis](#) to see which locations are reporting errors. Next, check your logs to see the last time the Uptime.com [Probe Servers](#) connected to your server and look for internal errors. If you still have questions after reviewing your logs, contact support@uptime.com.

We also encourage users to adopt notes. In the notes section of your [Advanced check options](#), you can record the steps you last took when you resolved an alert so the next time a check is triggered you have a log of how you solved each alert.

New Test Server Added

Subscribe to our [Status Page](#) to get updates on new Probe servers added to our list. Like our newest additional test server.

Probe Servers [Subscribe to updates](#) [Download CSV](#)

Uptime.com periodically adds or otherwise changes probe servers to ensure optimal experience with minimal downtime. Subscribe to the Uptime.com [Status Page](#) for updates to this list, including IP addresses and locations impacted, as well as other critical system updates.

Probe Name	Location	IP Address	IPv6 Address
US-Ohio(Amazon)-1 (TransactionTest)		18.222.234.162	2600:1f6:142:a800:8c10:fe27:6d8a:67aa

Industry News from Uptime.com

Spring 2021 Upload

We have an active Roadmap and used our annual team Summit to energize our ideas for the coming year. Uptime.com has a reputation for excellent performance monitoring and alerting. We plan to stick to what we do well and elevate our game.

Thanks to your feedback we are working to develop a number of exciting monitoring features.

What is External Monitoring

You likely do not own your server, but you do have an interest in making sure the applications you run on your server remain responsive. You need to know the full story, and a combination of external and internal monitoring is how you get there.

So how can internal or external monitoring help?
