

We're at the tail end of summer, time to start preparing for the fall flow of new business and opportunity. More traffic. More sales. More infrastructure to monitor and improve. Uptime.com is gearing up too, with a number of behind-the-scenes updates to our capabilities, response time, and commitment to stay UP for you.

Let's get to it.

What's Up at Uptime.com?

Tours and Guides

Users can take a tour of the Uptime.com platform to help navigate and learn our system. Learn how to setup your first check, create a status page, and find everything you need on Uptime.com. Whether you're training someone new, or you want a refresher, these guides are available to all.

Want to know about changes, improvements, or maintenance? Check the Uptime.com status page. You can subscribe to updates via Email or RSS, and see the status or upcoming changes of Uptime.com and our check probe servers.

Looking to Upgrade?

Need more checks? Want more SMS or phone credits? Bringing aboard new users, or do you need more reporting? If your plan allocation isn't fitting your needs, reach out to sales@uptime.com and we can customize any plan to suit your needs. Let's talk, and we'll help you find the monitoring you need for the right price.

Industry News from Uptime.com

7 Ways Your Status Page Can Save You

Status page updates create a timeline of events. A status page is most commonly used as a public platform for sharing information specific to your company's updates and incidents but, as they say, there's more than one way to skin a ca... -well, you get the idea.

We dissect the options, from internal updates to externally controlling communication.

Navigating With Reports: Monitoring and Metrics

Reports relay information; converting technology into text, telling you everything from where your concentrated areas of traffic originate, to device types used, initial page load times, and provide uptime and response-time metrics.

Who are these reports for? Which KPIs are the biggest drivers for your business?
